Interdisciplinarity

I have ample experience in interdisciplinary collaborations. I have worked with engineers, natural scientists, artists and designers. This ability to cross-disciplinary boundaries provides me with a flexibility and ability to communicate in lay language. It also inspires my teaching where I often find myself capturing students to questions and problems that are outside of their 'normal' disciplinary boundaries and practices.

I am also an expert on 'responsible research and innovation' which requires the ability to work in interdisciplinary projects.
